WORK EXPERIENCE

Title/Position

Zapbuild

03/2021 - Present

Mohali Punjab

Zapbuild is a technology solutions provider specializing in the transportation and logistics industry. They offer services such as software development, hardware and IoT prototyping, and customer support.

Achievements/Tasks

- Project Understanding:** Deeply understand project requirements, architecture, workflows, and business logic to ensure correct and scalable implementation.
- Code Review & Quality Assurance:** Review teammates' code for performance, readability, security, and maintainability. Ensure best coding practices and standards are followed.
- Task Planning & Delegation:** Break down project requirements into clear, manageable tasks. Assign tasks to team members based on strengths and timelines.
- Mentoring & Collaboration:** Guide junior engineers, support colleagues, and help solve technical blockers. Promote a collaborative and productive engineering environment.
- Hands-on Development:** Write clean, optimized, and scalable code. Lead development of key features and modules.
- Problem-Solving & Decision Making:** Provide technical solutions, optimize system performance, and make architectural decisions when needed.
- Communication with Stakeholders:** Update senior members and clients on progress, challenges, and timelines. Ensure clarity and alignment across the team.

Logimetricx

Workplace/Company

07/2019 - 03/2021

Lucknow

Achievements/Tasks

- Developed and maintained backend functionality using Node.js. Built RESTful APIs and optimized existing modules for better performance. Worked on databases, writing efficient SQL queries and migrations. Fixed bugs, improved system stability, and added new features.
- Participated in sprint planning, daily standups, and client discussions.
